**Subject:** Diamond Rock Sand & Gravel Mine

Mr. Kaiser,

I know that you're receiving lots and lots of mail about the proposed increase of truck traffic to and from the Diamond Rock mine...traffic which will in all likelihood pass through the various communities of the Ojai Valley.

I simply want to add my voice to those others in opposition to this plan, with my concerns primarily in the realms of health and safety. I believe that these both are elements of a peaceful community, which i and many many others in this valley are investing a lot of energy into creating.

If you can figure out how to get the rocks to where they're headed in a quiet way, without adding traffic to the already-overloaded 33, and without endangering drivers, residents, and students along the route, then more power to you. Until then, perhaps we can learn to live without the extra rocks.

Peace,  
-evan austin
