

# Los Padres National Forest ENVIRONMENTAL NEWSLETTER

September 1995

## DEAR FRIEND...

The purpose of the Environmental Newsletter is to provide you with an overview of proposed activities and projects in Los Padres National Forest. It is our hope that this information will help you become involved early in the planning process for those proposals which might interest or affect you.

The newsletter is issued every other month. It includes a brief explanation and location of each project, the date it was first addressed in this publication, and a contact point for further information. Projects are listed by county and by the categories described below.

For further information regarding specific projects, opportunities for participation, or the availability of documents, please contact the Forest Service office listed. For information on the environmental analysis process, contact NEPA Coordinator, Jim Turner. For all other matters regarding this newsletter, contact Kathy Good in the Public Affairs Office.

### Analyses Being Scoped

This category includes new projects for which public input is being or is about to be solicited.

### Analyses Completed

This category includes projects which have been "categorically excluded" from documentation in an Environmental Assessment (EA) or Environmental Impact Statement (EIS) and which have culminated in the preparation of a Decision Memo.

### Analyses Documented

This category addresses recently completed EA's and Draft and Final EIS's.

### Analyses In Progress

This section includes projects currently under analysis.

## FORESTWIDE

### Analyses Being Scoped

Oil and Gas Leasing Analysis. Forestwide environmental analysis (EIS) to identify lands which should or should not be made available for oil and gas leasing. The effort is in response to the 1987 Federal Onshore Oil and Gas Leasing Reform Act which directs the Forest Service to conduct availability and suitability studies of National Forest lands for oil and gas leasing. The decisions made as a result of this forestwide analysis will not result in on-the-ground activities. Any exploration, drilling or field development which might be proposed following the forestwide study would require further environmental analysis and separate site-specific decisions. Scoping has begun and five public meetings are scheduled. An information package is available upon request. Comments on the scope of the analysis should be submitted to the Forest Supervisor no later than October 20, 1995. For further information, contact Al Hess, Oil and Gas EIS Project Leader, at 805-681-2794. September, 1995.

### Analyses in Progress

Happy Canyon Allotment Management Plan. Analysis of the Happy Canyon Range Allotment Management Plan to ensure that it is in compliance with the Forest Plan and that all permit revisions are in compliance with NEPA. T.7N., R.29W., SBBM. Santa Barbara District - July, 1994.

Broadcast Peak Communications Site Plan. Proposal by the Forest Service to prepare a site management plan for Broadcast Peak communications site. The plan would provide direction for the future management of the site. It would delineate site boundaries, determine the kinds of uses which are (or would be) appropriate to the site, and identify any areas that could be developed. If the selected alternative allowed expansion of the site, the plan would also address the technical specifications and management requirements for existing, as well as new facilities that might be constructed. T.5N., R.29W., Section 7, SBBM. Santa Barbara District - September, 1995.

McPherson Peak Communications Site Plan. Proposal by the Forest Service to prepare a site management plan for McPherson Peak communications site. The plan would provide direction for the future management of the site. It would delineate site boundaries, determine the kinds of uses which are (or would be) appropriate to the site, and identify any areas that could be developed. If the selected alternative allowed expansion of the site, the plan would also address the technical specifications and management requirements for existing, as well as new facilities that might be constructed. T.9N., R.27W., Section 6, SBBM. Santa Lucia District - May, 1994.

Deer Park Canyon Test Well. Proposal by Hunt Oil Company to drill a 10,000 foot test well to explore for oil and gas in Deer Park Canyon. Proposal includes construction of a 1.37 acre well pad and approximately 200 feet of temporary access road. A surface reclamation plan will be required. T.9N., R.24W., Section 18, SBBM. Mt. Pinos District - May, 1994.

Camp Cielo. Proposal to issue a new twenty year special use permit to an existing organization camp due to a change in ownership. T.6N., R.29W., Section 32, SBB&M. Santa Barbara District - July, 1993.
